The publisher regrets that the printed version of the above article contained a number of typo errors inserted during proofing process. The publisher would like to apologise for any inconvenience caused. In particular:

- The units throughout the text must be in the form A/B instead of A/B⁻¹, i.e., cm³/min, °C/min, μmol/g, g_{cat}/m³, mol/m³, m²/s instead of cm³/min⁻¹, °C/min⁻¹, μmol/g⁻¹, g_{cat}/m⁻³, mol/m⁻³, m²/s⁻¹, respectively.

- In the definition of turnover frequency (Eq. (6)) the term B must be defined as the total CO₂ uptake in μmol/g, i.e. “...derived by the total CO₂ uptake in μmol/g (B) calculated by CO₂-TPD measurements” instead of “...derived by the total CO₂ uptake in 40 μmol/g (B) calculated by CO₂-TPD measurements”.
- The y-axis in Figure 7 must be dimensionless, i.e., ln(TOF) instead of ln(TOF) (s⁻¹).
